-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peters.

Peters discloses a picture frame having four extruded metal frame sections **F**, each extruded frame section including a receiving channel for receiving part of a corner piece **10** and two spaced apart lips **b** at the back of the frame section for providing access to a corner piece **10**, a corner piece **10** in each corner of the picture frame for securing together adjacent frame sections, each corner piece including two L-shaped plates **12**, **14** adapted to fit into the receiving channels of adjacent frame sections and a set screw **18** accessible through the gap between the lips **b** of the frame section. It is not known what the clearance is between the set screw and the edge of each lip, though it appears to be quite small. Nevertheless, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the gap between .005 inches and .010 inches because it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
